

## ID850e Floor Standing Dehumidifier

**Let us point you in  
the right direction!**

The ID850e 65 litre per day maximum capacity professional dehumidifier is IPX4 rated making it suitable for use in spas and swimming pool rooms. It can also be used in changing rooms, hotels, warehouses, museums, garages, gymnasiums and for all manner of industrial processes. Designed over 20 years ago then redesigned in 2010, this unit is built to the highest standard with a solid metal construction and plastic grills and top cover.

The ID850e is anti-chlorine coated internally to prevent damage from hydrochloric acid unlike most dehumidifiers specified for this purpose. It has a strong epoxy metal coated cabinet mounted on 4 rubber feet that means it can be placed on a level surface or indeed low wall mounted with the mounting bracket provided. Gravity drained through a plastic drain tub that can be drained from 3 points on the left, right and underneath.

In-built electronic humidistat regulates the humidity level while the two-speed fan controller allows for even faster drying in high humidity periods. Humidity level selection between 40-90% RH by simple toggle push button. Air filters are a tough nylon mesh that can be easily cleaned to keep performance to a maximum. Airflow is from front to top with directional louvres on the top.
