

SC14 - Cleaning Guide

Step 1:

Power up the unit to ensure it is in full working order. Measure the temperature of the coil to ensure the unit is working efficiently.

Step 2:

Remove filters from the unit. Wipe down the filters and then clean the filters with Safechem foam cleaner. Repeat process to ensure filters are clean.

Step 3:

Strip the unit for service so all components of the unit are visible. Clean the coils with Diversitech Universal Coil cleaner. This is repeated to ensure the coils are clean. All drip trays and the condensate is washed and cleaned thoroughly.

Step 4:

All of the wiring on the unit is checked to ensure no naked wires are visible and all wiring is safe and working correctly. The unit is then put back together and PAT tested to make sure the unit is safe.

Step 5:

Once this process has been completed the unit is then packaged and loaded into the van ready for delivery.

PRO-UNIVERSAL

Pro-Universal is a high performance coil cleaner that can be used on both evaporator and condenser coils to provide safe and highly effective cleaning with a minimum of time and effort. Pro-Universal is an NSF Food-Safe registered product that can be used to clean air conditioning and refrigeration equipment in food preparation and storage areas as well as restaurants and kitchens etc. Pro-Universal protects coils and can also be applied to drain trays to clean and protect metal surfaces.

Can be used for :- Evaporator cleaning, condenser cleaning and as a service cleaner for fan blades, air filters etc.

- **Ideal for indoor and outdoor coils**
- **Degreaser, detergent, deodoriser**
- **Protects coils and safe with condensate pumps**
- **Fin friendly formula – removes the dirt not the metal**
- **High dilution ratios – great value for money**
- **NSF Food-Safe registered product – can be used in food preparation and storage areas**
