ID950e Dehumidifier

The ID950e Dehumidifier is coated internally for use in the harshest swimming pool areas, and is the choice of professional installers worldwide

The ID950e high capacity professional dehumidifier has a claimed removal capacity of up to 81 L/24hrs (@ 32 degrees/90% RH), and an IPX4 rating making it suitable for spas and swimming pool rooms.

The D950e has a strong epoxy metal coated cabinet mounted on 4 rubber feet allowing placement on a level surface or indeed low wall mounted with the mounting bracket provided.

Gravity drainage through a plastic drain stub can be from the left, right or underneath. The D950e can be used with an optional external condensate pump should gravity drainage not be possible.

The ID950e can also be applied in changing rooms, hotels, warehouses, museums, garages, gymnasiums & for all manner of industrial processes. At 30 degrees C/70% RH the unit has a removal capacity of 61 L/24Hrs

Using the ID950e Dehumidifier

The in-built electronic humidistat regulates the humidity level while the two speed fan controller allows for even faster drying in high humidity periods. Humidity level selection is between 40-90% RH and is controlled by a simple push button.

The air filter can be accessed when the unit is floor or wall mounted, and is made from a tough nylon mesh that can be easily cleaned. Airflow is from front to top with directional louvres on the top of the unit.

ID950e Specifications

Power Supply - 240v 50Hz (1ph) / **Consumption** – 1400w / **Dimensions** - 720mm (H) x 660mm (W) 345mm (D)
Refrigerant - R410a / **Weight** - 39Kg / **Operating Temperature** – 7 to 35 Degrees C / **Noise Level** - (dB) 51
Auto Restart (Standard) **Auto Defrost** (Standard) / **Manufacturer Warranty** – 2 Years
