the right direction!**

The ACA12000C Wi-Fi Mobile Air Conditioner (3.2kW Cooling Duty)

The **ACA12000C Wi-Fi** offers tailor made indoor climate control. This model features Wi-Fi Control, yet also features a remote control and programmable 24 hour timer. The Wi-Fi Function is simple to operate using the connection to your Home/Office Wi-Fi Network. Simply download the app to your smart device and it is ready to use. Using the app allows you to remotely operate the unit whilst away from home and the advanced programming gives you total control and flexibility. (Compatible with most smart home automation devices).

This space saving, self-contained unit is straight to use out of the box and doesn't require any permanent installation. Four durable castor wheels and integrated side handles allow for easy mobility meaning the unit can be moved from room to room as and when required.

The digital control panel allows for quick and easy operation of fan speed, timer and temperature settings.

Compatible with most smart home automation devices (such as Amazon Echo, Alexa & Google Home)
